

Veradermics to Present at Upcoming June Investor Conferences

May 28, 2026

NEW HAVEN, Conn.--(BUSINESS WIRE)--May 28, 2026-- Veradermics, Incorporated (NYSE: MANE), a dermatologist-founded, late clinical-stage biopharmaceutical company focused on developing innovative therapeutics for pattern hair loss, today announced that company management will participate in the following upcoming investor conferences in June:

- **Jefferies Global Healthcare Conference** on Wednesday, June 3 in New York, NY
Reid Waldman, M.D., Chief Executive Officer of Veradermics, and Mark Neumann, Chief Commercial and Strategy Officer of Veradermics, will host a corporate presentation at 3:10 p.m. ET
- **Goldman Sachs 47th Annual Global Healthcare Conference** on Monday, June 8 in Miami, FL
Reid Waldman, M.D., Chief Executive Officer of Veradermics, will host a corporate presentation at 2:00 p.m. ET

Live webcasts of the presentations will be available on the “[Events](#)” page of the “Investors” section of the Company’s website at ir.veradermics.com. A replay of each webcast will be available for approximately 30 days following the event.

About VDPHL01

VDPHL01 (extended-release minoxidil tablet) is a proprietary investigational, orally available non-hormonal drug in Phase 3 development for pattern hair loss in both women and men. VDPHL01 leverages extended-release technology to deliver a minoxidil product with the potential for improved efficacy and safety. The proprietary extended-release formulation utilizes a gel matrix designed to deliver long-lasting, steady release of minoxidil for sustained absorption. VDPHL01 has been shown to avoid the high peak concentrations of immediate-release oral minoxidil, while extending time above the minimum hair growth threshold to increase time for hair to grow. If approved, VDPHL01 would be the only FDA-approved oral non-hormonal treatment for pattern hair loss in both male and female patients. VDPHL01 is protected by a broad library of patents and patent applications related to the key innovations of VDPHL01. The earliest expiring patent term is 2043.

About Pattern Hair Loss

Pattern hair loss, also known as androgenetic alopecia, affects an estimated 80 million people in the United States (30 million women and 50 million men). Pattern hair loss can have a significant impact on quality of life, affecting an individual’s mental health and relationships. People with pattern hair loss often experience depression, low self-esteem and social withdrawal. There have been no new FDA-approved prescription medicines for pattern hair loss in nearly 30 years. In addition to prescription medicines, current treatments include over-the-counter “nutraceuticals” that produce inconsistent results and contribute to high dissatisfaction among patients and healthcare providers. The prevalence of pattern hair loss and the market demand for new treatments contribute to making it the largest aesthetics market worldwide, projected to reach approximately \$30 billion by 2028.

About Veradermics, Inc.

Veradermics is a dermatologist-founded, late clinical-stage biopharmaceutical company focused on developing innovative therapeutics for pattern hair loss. Veradermics aims to develop a focused portfolio of aesthetic dermatology product candidates targeting high-prevalence dermatologic conditions, with potential selective development of medical dermatology product candidates. Its lead program, VDPHL01, is being developed as an oral, non-hormonal treatment for men and women with pattern hair loss, to reduce the barriers to wide adoption of chronic hair loss therapy and potentially transform pattern hair loss treatment. VDPHL01 is an oral, extended-release proprietary formulation of minoxidil, a proven hair growth agent, designed to maximize minoxidil’s impact on hair restoration while minimizing the risk of cardiac activity.
